

Calculator :

$$0,2 \times 100$$

Correction :

$$0,2 \times 100 = 20$$

Voici un dessin à codé à main levée.

Quel est le périmètre du triangle ?

Correction :

Le périmètre du triangle est égal à :

$$P = 3 \times 2,5$$

$$P = 7,5 \text{ cm}$$

$$\frac{3}{5} = \frac{18}{\dots}$$

Correction :

$$\frac{1}{4} = \frac{?}{100}$$

Correction :

The diagram illustrates the process of simplifying the fraction $\frac{1}{4}$ to $\frac{25}{100}$. It features the equation $\frac{1}{4} = \frac{25}{100}$ in the center. The number 25 in the numerator is written in a large, bold, blue font. Two light blue circles, each containing the text "× 25", are positioned above and below the equals sign. A curved arrow points from the top circle to the numerator 25, and another curved arrow points from the bottom circle to the denominator 100, indicating that both parts of the fraction were multiplied by 25.

$$\frac{1}{4} = \frac{25}{100}$$

Simplifier au maximum :

$$\frac{12}{18}$$

Correction :

The diagram illustrates the simplification of the fraction $\frac{12}{18}$ to $\frac{2}{3}$. The fraction is written with a horizontal line between the numerator and denominator. The numerator is 12 and the denominator is 18. The simplified fraction is shown to the right, with a blue 2 in the numerator and a 3 in the denominator. Two blue circles, each containing the text $\div 6$, are positioned above and below the fraction. Arrows point from the top circle to the numerator 12 and the denominator 18, and from the bottom circle to the numerator 2 and the denominator 3, indicating the division process.

$$\frac{12}{18} = \frac{2}{3}$$
